

GE
Security

Alliance™

think beyond

modular. powerful. affordable.

As the first truly integrated security solution for commercial applications, the Alliance™ platform opens doors to greater efficiencies, reduces security costs, and improves serviceability in facilities across the globe. That translates to savings for you and your customers in the areas of labor, materials, training, usability, and more.

See why Alliance is a more intelligent, more convenient option for security professionals and end users alike:

- **Powerful.** Through a single programming interface, user interface, and database, Alliance reduces system training and adds the ability to run reports, make system updates, and run diagnostic history.
- **Scalable.** Unlike interfaced security systems, Alliance's integrated solution

provides the power and scalability to secure small, large, and multi-site commercial facilities. Meet customer needs today, tomorrow, and into the future without worrying about removing existing systems to accommodate unexpected growth.

- **Affordable.** Three technologies in a single system maximize installation and operational efficiencies, reducing both labor and training requirements, as well as inventory for installation and service.
- **Flexible.** Alliance's system architecture adds enhanced intrusion detection with hardwired, wireless, or addressable devices while securing a facility with access, elevator, and video control—ultimately delivering a unique, optimized solution for a wide variety to end users.

Intrusion Detection Solutions

Magnetic Contacts

Glassbreak Sensor Family

Invest in a system that adapts to growing businesses.

Unlike interfaced security systems, Alliance is designed with expansion in mind—so it can grow and change with your customers' businesses. And it's adaptable, whether you use it as a complete solution, a standalone product, or integrate it with existing infrastructure like the GE Security systems shown above.

No matter your requirements, you can count on the reliability and innovation that are synonymous with GE, one of the most trusted and recognized brands in the world.

Think beyond traditional security.

Use the unmatched features of GE's Alliance platform and gain greater efficiencies for you and your customers while lowering overhead. GE's integration of access control, intrusion detection and video surveillance into a single, scalable platform delivers unprecedented performance at an affordable price.

Choosing System Software

Alliance software enables you to explore and program features such as vault management, anti-passback, region control, user tracking, and more. Use this chart to determine which version of Alliance software is right for your client's individual needs.

Alliance Software Comparison

	Alliance Professional	Alliance Enterprise
Workstations (host/clients)	1	1/4
Control panels per system	8	32
DVMRs per system	2	8
Cardholders per system	65,000	130,000
TCP/LAN connectivity	x	x
Photo badging	x	x

Selecting a System Control Panel

Each Alliance control panel provides central station intrusion detection, 16 remote arming stations (RAS), partitions for individual suites, and a variety of communications options. Use this chart to see the differences in each and decide which panels work for you and your customers.

Alliance Control Panel Comparison

	AL-4617	AL-4017	AL-3017	AL-2017
Areas (system partitions)	16	16	8	4
Doors controlled through panel	16	16	16	16
Zone inputs on panel/per system	16/256	16/256	8/64	8/32
Programmable outputs/per system	1/255	1/255	1/255	1/255
Advanced access control doors	48	48	12	0
Power output	3A	1A	300mA	300mA
Maximum users/expanded memory	65,535	65,535	11,466	50

GE Security has designed and manufactured access control, intrusion and fire detection, explosives and narcotics detection, key control and fiber-optic transmission systems for nearly 30 years. It is our vision to be the world's premier security company offering innovative technology solutions to help our customers protect people, assets and communities.

GE Security is a wholly owned subsidiary of the General Electric Company (NYSE: GE) focused on communication and information technologies for security, safety and lifestyle enhancements. GE Security has operations in more than 30 countries and is represented by some of the best-known brand names for intrusion and fire detection, access and building control, video surveillance, explosive and drug detection, key management and structured wiring.
